### SKILLS

Python, JavaScript, C#, Node, React, Express, HTML, CSS, OOP, MySQL, Agile Development, API's, Web API's, User Authentication, OAuth, Heroku, Jest, GitHub, DOM

### PROFILE

Passionate and detail-oriented Computer Information Systems (CIS) student with over 1 year of experience in customer facing CIS help desk agent roles. I have been enthusiastic about technology from a young age ever since I got my first gaming system. I am hoping to leverage my leadership skills as well as all the skills I have learnt in Computer Science and Development to help the engineering team complete their task

SOFTWARE ENGINEER

[Date]

[Hiring Manager's Name]

[Street Address]

[City, State/Province]

[Job Reference ID, if applicable]

Dear [Hiring Manager's Name]

I've always been a diligent worker who pays a great deal of attention to detail – attributes I believe can be easily carried over into this new role. Over the course of my studies in the Information Systems field, I've had an opportunity to hone some of my communication, writing and other clerical skills, and that, combined with my affinity for technology, make me the ideal candidate for this student worker position.

In the last year, I've taken several courses that directly improved some of the skills needed to be successful in this role, including Word processing and spreadsheets, where I had the opportunity to work with data and deliver it in a clear and concise manner. As a player on Aquinas' men's volleyball team, I've developed collaborative skills that make me an asset to any team that I am a part of, but I can also be a motivated self-starter when the situation calls for it.

Given my academic background and experience in previous clerical roles, I know that I can hit the ground running and make a significant contribution to your office's goals. I look forward to hearing back from you about possible next steps

Closing,

[Darnell Eudoxie]
